Subject Index

Volume 74, January-June 1994

A

Abdominal aorta
Input Impedance of the Lower Abdominal Aorta in Chronically Instrumented Fetal Sheep, 641

Abnormal automaticity
Receptor-Effector Coupling Pathway for α_1-Adrenergic Modulation of Abnormal Automaticity in 'Ischemic' Canine Purkinje Fibers, 937

Acetylcholine
Impaired Nitric Oxide–Mediated Flow-Induced Dilation in Arterioles of Spontaneously Hypertensive Rats, 416
Purinergic Axis in Cardiac Blood Vessels: Agonist-Mediated Release of ATP From Cardiac Endothelial Cells, 401

Acidosis
Acidemia and Hypernatremia Enhance Postischemic Recovery of Excitation-Contraction Coupling, 1197
Myocardial Ischemic Contracture: Metabolites Affect Rigor Tension Development and Stiffness, 920

Acquired immunodeficiency syndrome
Cardiac Mitochondrial DNA Polymerase-γ Is Inhibited Competitively and Noncompetitively by Phosphorylated Zidovudine, 344

α-Actin
α-Skeletal Actin Is Associated With Increased Contractility in the Mouse Heart, 740

***cis*-Acting elements**
cis-Regulatory Elements and *trans*-Acting Factors Directing Basal and cAMP-Stimulated Human Renin Gene Expression in Chorionic Cells, 764

***trans*-Acting factors**
cis-Regulatory Elements and *trans*-Acting Factors Directing Basal and cAMP-Stimulated Human Renin Gene Expression in Chorionic Cells, 764

Action potentials
Significance of Inwardly Directed Transmembrane Current in Determination of Local Myocardial Electrical Activation During Ventricular Fibrillation, 507
Subthreshold Stimulation of Purkinje Fibers Interrupts Ventricular Tachycardia in Intact Hearts: Experimental Study With Voltage-Sensitive Dyes and Imaging Techniques, 604

Active site
Distinct Receptors and Signaling Pathways in α-Thrombin– and Thrombin Receptor Peptide–Induced Vascular Contractions, 930

Adenine nucleotides
Myocardial Ischemic Contracture: Metabolites Affect Rigor Tension Development and Stiffness, 920

Adenosine
ATP-Sensitive K^+ Channels Mediate Dilatation of Cerebral Arterioles During Hypoxia, 1005
Ca^{2+} Preconditioning Elicits a Unique Protection Against the Ca^{2+} Paradox Injury in Rat Heart: Role of Adenosine, 360
Purinergic Axis in Cardiac Blood Vessels: Agonist-Mediated Release of ATP From Cardiac Endothelial Cells, 401

Adenylyl cyclase
Changes in Type VI Adenylyl Cyclase Isoform Expression Correlate With a Decreased Capacity for cAMP Generation in the Aging Ventricle, 596
Characterization of Muscarinic Acetylcholine Receptors Expressed by an Atrial Cell Line Derived From a Transgenic Mouse Tumor, 752

Adhesion
Osteopontin Promotes Vascular Cell Adhesion and Spreading and Is Chemotactic for Smooth Muscle Cells In Vitro, 214

ADP
ADP Inhibits the Sliding Velocity of Fluorescent Actin Filaments on Cardiac and Skeletal Myosins, 1027
Purinergic Axis in Cardiac Blood Vessels: Agonist-Mediated Release of ATP From Cardiac Endothelial Cells, 401

β-Adrenergic receptor kinase
Expression of β-Arrestins and β-Adrenergic Receptor Kinases in the Failing Human Heart, 206

β_2-Adrenergic receptors
β_2-Adrenergic Receptor and Angiotensin II Receptor Modulation of Sympathetic Neurotransmission in Human Atria, 434
β-Adrenergic Receptor Stimulation Increases Unloaded Shortening Velocity of Skinned Single Ventricular Myocytes From Rats, 542
Expression of β-Arrestins and β-Adrenergic Receptor Kinases in the Failing Human Heart, 206
Receptor-Effector Coupling Pathway for α_1-Adrenergic Modulation of Abnormal Automaticity in 'Ischemic' Canine Purkinje Fibers, 937

Aequorin
Acidemia and Hypernatremia Enhance Postischemic Recovery of Excitation-Contraction Coupling, 1197

Afferent arterioles
Hypoxia Inhibits Myogenic Reactivity of Renal Afferent Arterioles by Activating ATP-Sensitive K^+ Channels, 861

Afterdepolarizations
A Dynamic Model of the Cardiac Ventricular Action Potential: II. Afterdepolarizations, Triggered Activity, and Potentiation, 1097

Aging
Changes in Type VI Adenylyl Cyclase Isoform Expression Correlate With a Decreased Capacity for cAMP Generation in the Aging Ventricle, 596

Air stress
Brain "Ouabain" Mediates the Sympathoexcitatory and Hypertensive Effects of High Sodium Intake in Dahl Salt-Sensitive Rats, 586

Alternative splicing
Molecular Basis of Cardiac Troponin T Isoform Heterogeneity in Rabbit Heart, 41

Anaerobic glycolysis
The Relative Importance of Myocardial Energy Metabolism Compared With Ischemic Contracture in the Determination of Ischemic Injury in Isolated Perfused Rabbit Hearts, 817

Anaphylatoxins
Interleukin-2–Induced Lung Injury: The Role of Complement, 329

Angiotensin-converting enzyme inhibitors
Importance of Sympathetic Innervation in the Positive Inotropic Effects of Bradykinin and Ramiprilat, 441

Angiotensin II
β_2-Adrenergic Receptor and Angiotensin II Receptor Modulation of Sympathetic Neurotransmission in Human Atria, 434
Angiotensin II Stimulates NADH and NADPH Oxidase Activity in Cultured Vascular Smooth Muscle Cells, 1141
Integrin-Mediated Collagen Gel Contraction by Cardiac Fibroblasts: Effects of Angiotensin II, 291

Anisotropy
Anisotropy of Water Diffusion in the Myocardium of the Rat, 789
Subthreshold Stimulation of Purkinje Fibers Interrupts Ventricular Tachycardia in Intact Hearts: Experimental Study With Voltage-Sensitive Dyes and Imaging Techniques, 604
Tissue-Specific Determinants of Anisotropic Conduction Velocity in Canine Atrial and Ventricular Myocardium, 1065

Antiarrhythmic agents
Imipramine Blocks Rapidly Activating and Delays Slowly Activating K^+ Current Activation in Guinea Pig Ventricular Myocytes, 687
Antibody inhibition of free fatty acid transfer
The Capillary Transport System for Free Fatty Acids in the Heart, 1015
Antihypercholesterolemic agents
3-Hydroxy-3-methyl Glutaryl Coenzyme A Reductase Inhibition Modulates Vasopressin-Stimulated Ca^{2+} Responses in Rat A10 Vascular Smooth Muscle Cells, 173
Antioxidants
Activation of Cardiac Vagal Afferents by Oxygen-Derived Free Radicals in Rats, 895
Activation of Cardiac Vagal Afferents in Ischemia and Reperfusion: Prostaglandins Versus Oxygen-Derived Free Radicals, 904
Aortic development
Developmentally Timed Expression of an Embryonic Growth Phenotype in Vascular Smooth Muscle Cells, 189
Apoptosis
Deregulated Expression of the c-*myc* Oncogene Abolishes Inhibition of Proliferation of Rat Vascular Smooth Muscle Cells by Serum Reduction, Interferon-γ, Heparin, and Cyclic Nucleotide Analogues and Induces Apoptosis, 525
Apparent maximum conduction velocity
Subthreshold Stimulation of Purkinje Fibers Interrupts Ventricular Tachycardia in Intact Hearts: Experimental Study With Voltage-Sensitive Dyes and Imaging Techniques, 604
Aprikalim
ATP-Sensitive K^+ Channels Mediate Dilatation of Cerebral Arterioles During Hypoxia, 1005
Arachidonic acid
Impaired Nitric Oxide–Mediated Flow-Induced Dilation in Arterioles of Spontaneously Hypertensive Rats, 416
L-Arginine
Mechanisms of the Endothelial Toxicity of Cyclosporin A: Role of Nitric Oxide, cGMP, and Ca^{2+}, 477
β-Arrestin
Expression of β-Arrestins and β-Adrenergic Receptor Kinases in the Failing Human Heart, 206
Arterial wall transport
Relative Significance of Endothelium and Internal Elastic Lamina in Regulating the Entry of Macromolecules Into Arteries In Vivo, 74
Ascorbyl radical
Ascorbyl Free Radical as a Real-time Marker of Free Radical Generation in Briefly Ischemic and Reperfused Hearts: An Electron Paramagnetic Resonance Study, 650
Vascular Free Radical Release: Ex Vivo and In Vivo Evidence for a Flow-Dependent Endothelial Mechanism, 700
AT_1 receptor
Integrin-Mediated Collagen Gel Contraction by Cardiac Fibroblasts: Effects of Angiotensin II, 291
Atherosclerosis
Inhibition of Inducible Nitric Oxide Synthase in Macrophages by Oxidized Low-Density Lipoproteins, 318
Regulation of Vascular Cell Adhesion Molecule-1 and Intercellular Adhesion Molecule-1 in Human Vascular Smooth Muscle Cells, 225
Atomic force microscopy
Shear Stress–Induced Reorganization of the Surface Topography of Living Endothelial Cells Imaged by Atomic Force Microscopy, 163
ATP
Effect of Extracellular ATP on the Na^+ Current in Rat Ventricular Myocytes, 710
Myocardial Metabolism During Increased Work States in the Porcine Left Ventricle In Vivo, 64
Purinergic Axis in Cardiac Blood Vessels: Agonist-Mediated Release of ATP From Cardiac Endothelial Cells, 401
ATP-sensitive K^+ channels
Atrial Natriuretic Factor and Isosorbide Dinitrate Modulate the Gating of ATP-Sensitive K^+ Channels in Cultured Vascular Smooth Muscle Cells, 471
Hypoxia Inhibits Myogenic Reactivity of Renal Afferent Arterioles by Activating ATP-Sensitive K^+ Channels, 861
Atrial fibrillation
Mapping the Conversion of Atrial Flutter to Atrial Fibrillation and Atrial Fibrillation to Atrial Flutter: Insights Into Mechanisms, 882
Atrial flutter
Mapping the Conversion of Atrial Flutter to Atrial Fibrillation and Atrial Fibrillation to Atrial Flutter: Insights Into Mechanisms, 882
Atrial myocytes
Phasic Secretion of Newly Synthesized Atrial Natriuretic Factor From Unstimulated Atrial Myocytes in Culture, 659
Atrial natriuretic factor
Atrial Natriuretic Factor and Isosorbide Dinitrate Modulate the Gating of ATP-Sensitive K^+ Channels in Cultured Vascular Smooth Muscle Cells, 471
Brefeldin A Defines Distinct Pathways for Atrial Natriuretic Factor Secretion in Neonatal Rat Atrial and Ventricular Myocytes, 33
Endothelin-Stimulated Secretion of Natriuretic Peptides by Rat Atrial Myocytes Is Mediated by Endothelin A Receptors, 460
Hemodynamics in Transgenic Mice With Overexpression of Atrial Natriuretic Factor, 747
Phasic Secretion of Newly Synthesized Atrial Natriuretic Factor From Unstimulated Atrial Myocytes in Culture, 659
Atropine
Endothelium-Mediated and Direct Actions of Acetylcholine on Rabbit Aortic Baroreceptors, 422
Autoradiography
Downregulation of Myocardial β-Adrenergic Receptors: Receptor Subtype Selectivity, 369
Autoregulation
Hemodynamics in Transgenic Mice With Overexpression of Atrial Natriuretic Factor, 747

B

Basic fibroblast growth factor
Expression and Subcellular Distribution of Basic Fibroblast Growth Factor Are Regulated During Migration of Endothelial Cells, 485
High-Density Lipoprotein Stimulates Endothelial Cell Movement by a Mechanism Distinct From Basic Fibroblast Growth Factor, 1149
β-Blocker
Importance of Sympathetic Innervation in the Positive Inotropic Effects of Bradykinin and Ramiprilat, 441
Blood flow
Measurement of Renal Perfusion and Blood Flow With Fast Computed Tomography, 945
Peripheral Adaptations in Trained Aged Rats With Femoral Artery Stenosis, 235
Time Course of Flow-Induced Smooth Muscle Cell Proliferation and Intimal Thickening in Endothelialized Baboon Vascular Grafts, 14
Blood pressure
Hemodynamics in Transgenic Mice With Overexpression of Atrial Natriuretic Factor, 747
Blood vessels
Purinergic Axis in Cardiac Blood Vessels: Agonist-Mediated Release of ATP From Cardiac Endothelial Cells, 401
Blood volume
Hemodynamics in Transgenic Mice With Overexpression of Atrial Natriuretic Factor, 747
Bradykinin
Intracellular Alkalinization Induced by Bradykinin Sustains Activation of the Constitutive Nitric Oxide Synthase in Endothelial Cells, 1220
Purinergic Axis in Cardiac Blood Vessels: Agonist-Mediated Release of ATP From Cardiac Endothelial Cells, 401

Brain α_2-adrenergic receptor stimulation
Brain "Ouabain" Mediates the Sympathoexcitatory and Hypertensive Effects of High Sodium Intake in Dahl Salt-Sensitive Rats, 586
Brain natriuretic peptide
Endothelin-Stimulated Secretion of Natriuretic Peptides by Rat Atrial Myocytes Is Mediated by Endothelin A Receptors, 460
Brain ouabain-like activity
Brain "Ouabain" Mediates the Sympathoexcitatory and Hypertensive Effects of High Sodium Intake in Dahl Salt-Sensitive Rats, 586
Brefeldin A
Brefeldin A Defines Distinct Pathways for Atrial Natriuretic Factor Secretion in Neonatal Rat Atrial and Ventricular Myocytes, 33
8-Bromo-cGMP
Atrial Natriuretic Factor and Isosorbide Dinitrate Modulate the Gating of ATP-Sensitive K^+ Channels in Cultured Vascular Smooth Muscle Cells, 471
2,3-Butanedione monoxime
The cAMP Response Element Binding Protein Is Expressed and Phosphorylated in Cardiac Myocytes, 1042
The Relative Importance of Myocardial Energy Metabolism Compared With Ischemic Contracture in the Determination of Ischemic Injury in Isolated Perfused Rabbit Hearts, 817
Bypass graft occlusion
Wall Shear Stress Temporal Gradient and Anastomotic Intimal Hyperplasia, 1227

C

C elegans
Cardiovascular Development: Prospects for a Genetic Approach, 757
c-fos
Extracellular ATP Induces Immediate-Early Gene Expression but Not Cellular Hypertrophy in Neonatal Cardiac Myocytes, 1034
C protein
Effects of Phosphorylation of Troponin I and C Protein on Isometric Tension and Velocity of Unloaded Shortening in Skinned Single Cardiac Myocytes From Rats, 718
Ca^{2+}
A Dynamic Model of the Cardiac Ventricular Action Potential: I. Simulations of Ionic Currents and Concentration Changes, 1071
A Functional Ryanodine-Sensitive Intracellular Ca^{2+} Store Is Present in Vascular Endothelial Cells, 151
Acidemia and Hypernatremia Enhance Postischemic Recovery of Excitation-Contraction Coupling, 1197
Ca^{2+} Preconditioning Elicits a Unique Protection Against the Ca^{2+} Paradox Injury in Rat Heart: Role of Adenosine, 360
Contractile Arrest Increases Sarcoplasmic Reticulum Calcium Uptake and SERCA2 Gene Expression in Cultured Neonatal Rat Heart Cells, 991
Effect of Ischemia and Reperfusion on Cardiac Ryanodine Receptors–Sarcoplasmic Reticulum Ca^{2+} Channels, 271
Effects of Phosphorylation of Troponin I and C Protein on Isometric Tension and Velocity of Unloaded Shortening in Skinned Single Cardiac Myocytes From Rats, 718
Enhanced Na^+-Ca^{2+} Exchange Activity in Cardiomyopathic Syrian Hamster, 253
Intracellular Calcium Transient of Working Human Myocardium of Seven Patients Transplanted for Congestive Heart Failure, 952
Mechanisms of the Endothelial Toxicity of Cyclosporin A: Role of Nitric Oxide, cGMP, and Ca^{2+}, 477
Modulation of Ca^{2+} Release in Cultured Neonatal Rat Cardiac Myocytes: Insight From Subcellular Release Patterns Revealed by Confocal Microscopy, 979
Relaxin Increases Heart Rate by Modulating Calcium Current in Cardiac Pacemaker Cells, 537
Subcellular Mechanism for Ca^{2+}-Dependent Enhancement of Delayed Rectifier K^+ Current in Isolated Membrane Patches of Guinea Pig Ventricular Myocytes, 96
Caffeine
Contractile Arrest Increases Sarcoplasmic Reticulum Calcium Uptake and SERCA2 Gene Expression in Cultured Neonatal Rat Heart Cells, 991
Calmodulin
Subcellular Mechanism for Ca^{2+}-Dependent Enhancement of Delayed Rectifier K^+ Current in Isolated Membrane Patches of Guinea Pig Ventricular Myocytes, 96
cAMP
cis-Regulatory Elements and *trans*-Acting Factors Directing Basal and cAMP-Stimulated Human Renin Gene Expression in Chorionic Cells, 764
Relaxin Increases Heart Rate by Modulating Calcium Current in Cardiac Pacemaker Cells, 537
The cAMP Response Element Binding Protein Is Expressed and Phosphorylated in Cardiac Myocytes, 1042
Capillarity
Peripheral Adaptations in Trained Aged Rats With Femoral Artery Stenosis, 235
Capillary transfer of free fatty acids
The Capillary Transport System for Free Fatty Acids in the Heart, 1015
Captopril
Exaggerated Vascular Response Due to Endothelial Dysfunction and Role of the Renin-Angiotensin System at Early Stage of Renal Hypertension in Rats, 130
Cardiac action potential
A Dynamic Model of the Cardiac Ventricular Action Potential: I. Simulations of Ionic Currents and Concentration Changes, 1071
Short-term Diabetes Alters K^+ Currents in Rat Ventricular Myocytes, 620
Cardiac cell cultures
Characterization of Muscarinic Acetylcholine Receptors Expressed by an Atrial Cell Line Derived From a Transgenic Mouse Tumor, 752
Cardiac chemosensitive endings
Activation of Cardiac Vagal Afferents by Oxygen-Derived Free Radicals in Rats, 895
Activation of Cardiac Vagal Afferents in Ischemia and Reperfusion: Prostaglandins Versus Oxygen-Derived Free Radicals, 904
Cardiac contraction
8-Bromo-cGMP Reduces the Myofilament Response to Ca^{2+} in Intact Cardiac Myocytes, 970
Cardiac development
Steady-State mRNA Levels of the Sarcolemmal Na^+-Ca^{2+} Exchanger Peak Near Birth in Developing Rabbit and Rat Hearts, 354
Cardiac endothelial cells
Purinergic Axis in Cardiac Blood Vessels: Agonist-Mediated Release of ATP From Cardiac Endothelial Cells, 401
Cardiac function
Hyaluronate Degradation Affects Ventricular Function of the Early Postlooped Embryonic Rat Heart In Situ, 244
Cardiac gap junctions
Role of Histidine 95 on pH Gating of the Cardiac Gap Junction Protein Connexin43, 1058
Cardiac glycosides
The Failing Human Heart Is Unable to Use the Frank-Starling Mechanism, 959
Cardiac hypertrophy
Angiotensin II Induces Fibronectin Expression Associated With Cardiac Fibrosis in the Rat, 727
Myocyte Cellular Hyperplasia and Myocyte Cellular Hypertrophy Contribute to Chronic Ventricular Remodeling in Coronary Artery Narrowing–Induced Cardiomyopathy in Rats, 383
Sarcoplasmic Reticulum Gene Expression in Cardiac Hypertrophy and Heart Failure, 555
Cardiac muscle
Myofilament Ca^{2+} Sensitivity in Intact Versus Skinned Rat Ventricular Muscle, 408

Taurine Depletion and Excitation-Contraction Coupling in Rat Myocardium, 1210

Cardiac myocytes
β-Adrenergic Receptor Stimulation Increases Unloaded Shortening Velocity of Skinned Single Ventricular Myocytes From Rats, 542
Brefeldin A Defines Distinct Pathways for Atrial Natriuretic Factor Secretion in Neonatal Rat Atrial and Ventricular Myocytes, 33
Extracellular ATP Induces Immediate-Early Gene Expression but Not Cellular Hypertrophy in Neonatal Cardiac Myocytes, 1034
Presence of Chloride-Formate Exchange in Vascular Smooth Muscle and Cardiac Cells, 48
Protein Kinase C Isoform Expression and Regulation in the Developing Rat Heart, 299

Cardiac output
Hemodynamics in Transgenic Mice With Overexpression of Atrial Natriuretic Factor, 747

Cardiac pacing
Ventricular Mechanoreflex and Chemoreflex Alterations in Chronic Heart Failure, 262

Cardiac reflex
Ventricular Mechanoreflex and Chemoreflex Alterations in Chronic Heart Failure, 262

Cardiac repolarization
Triamterene Inhibits the Delayed Rectifier Potassium Current (I_K) in Guinea Pig Ventricular Myocytes, 1114

Cardiocytes
Electrical Stimulation of Contractile Activity Accelerates Growth of Cultured Neonatal Cardiocytes, 448

Cardiomyopathy
Cardiac Mitochondrial DNA Polymerase-γ Is Inhibited Competitively and Noncompetitively by Phosphorylated Zidovudine, 344
Enhanced Na^+-Ca^{2+} Exchange Activity in Cardiomyopathic Syrian Hamster, 253
Intracellular Calcium Transient of Working Human Myocardium of Seven Patients Transplanted for Congestive Heart Failure, 952
Viral Infection and the Pathogenesis of Dilated Cardiomyopathy, 182

Caveolae
Downregulation of Myocardial β-Adrenergic Receptors: Receptor Subtype Selectivity, 369

cDNA transfection
Human Connexin43 Gap Junction Channels: Regulation of Unitary Conductances by Phosphorylation, 1050

Cell fate
Cardiovascular Development: Prospects for a Genetic Approach, 757

Cell motility
High-Density Lipoprotein Stimulates Endothelial Cell Movement by a Mechanism Distinct From Basic Fibroblast Growth Factor, 1149

Cell surface
Shear Stress–Induced Reorganization of the Surface Topography of Living Endothelial Cells Imaged by Atomic Force Microscopy, 163

Cerebral microcirculation
ATP-Sensitive K^+ Channels Mediate Dilatation of Cerebral Arterioles During Hypoxia, 1005

cGMP
8-Bromo-cGMP Reduces the Myofilament Response to Ca^{2+} in Intact Cardiac Myocytes, 970
Methylene Blue Reverses Endotoxin-Induced Hypotension, 1121

cGMP endothelium-dependent responses
Mechanisms of the Endothelial Toxicity of Cyclosporin A: Role of Nitric Oxide, cGMP, and Ca^{2+}, 477

Chloride-formate exchange
Presence of Chloride-Formate Exchange in Vascular Smooth Muscle and Cardiac Cells, 48

Chorionic cells
cis-Regulatory Elements and *trans*-Acting Factors Directing Basal and cAMP-Stimulated Human Renin Gene Expression in Chorionic Cells, 764

Cl^- channels
Properties of a Protein Kinase C–Activated Chloride Current in Guinea Pig Ventricular Myocytes, 121

Coated pits
Downregulation of Myocardial β-Adrenergic Receptors: Receptor Subtype Selectivity, 369

Cocaine
Cocaine-Induced Microvascular Spasm in Yucatan Miniature Swine: In Vivo and In Vitro Evidence of Spasm, 281

Collagen gels
Integrin-Mediated Collagen Gel Contraction by Cardiac Fibroblasts: Effects of Angiotensin II, 291

Computed tomography
Measurement of Renal Perfusion and Blood Flow With Fast Computed Tomography, 945

Conduction delay
Cellular Uncoupling Induced by Accumulation of Long-Chain Acylcarnitine During Ischemia, 83

Conduction system
Restricted Distribution of Connexin40, a Gap Junctional Protein, in Mammalian Heart, 839

Confocal Ca^{2+} imaging
Modulation of Ca^{2+} Release in Cultured Neonatal Rat Cardiac Myocytes: Insight From Subcellular Release Patterns Revealed by Confocal Microscopy, 979

Connexins
Restricted Distribution of Connexin40, a Gap Junctional Protein, in Mammalian Heart, 839
Role of Histidine 95 on pH Gating of the Cardiac Gap Junction Protein Connexin43, 1058
Tissue-Specific Determinants of Anisotropic Conduction Velocity in Canine Atrial and Ventricular Myocardium, 1065

Constitutive pathway
Brefeldin A Defines Distinct Pathways for Atrial Natriuretic Factor Secretion in Neonatal Rat Atrial and Ventricular Myocytes, 33
Phasic Secretion of Newly Synthesized Atrial Natriuretic Factor From Unstimulated Atrial Myocytes in Culture, 659

Contraction
Distinct Receptors and Signaling Pathways in α-Thrombin– and Thrombin Receptor Peptide–Induced Vascular Contractions, 930
Electrical Stimulation of Contractile Activity Accelerates Growth of Cultured Neonatal Cardiocytes, 448

Coronary arteries
Distinct Receptors and Signaling Pathways in α-Thrombin– and Thrombin Receptor Peptide–Induced Vascular Contractions, 930
Reoxygenation-Induced Relaxation of Coronary Arteries: A Novel Endothelium-Dependent Mechanism, 870

Coronary circulation
Cocaine-Induced Microvascular Spasm in Yucatan Miniature Swine: In Vivo and In Vitro Evidence of Spasm, 281
Inhibition of Nitric Oxide Production Aggravates Myocardial Hypoperfusion During Exercise in the Presence of a Coronary Artery Stenosis, 629
Potent Vasoconstriction Mediated by Endothelin ET_B Receptors in Canine Coronary Arteries, 105
The Mechanism of Coronary Collateral Vasoconstriction in Response to Cyclooxygenase Blockade, 310

Coronary capacitance
Three-Dimensional Transmural Mechanical Interaction Between the Coronary Vasculature and Passive Myocardium in the Dog, 1166

Coronary occlusion
Conscious Rabbits Become Tolerant to Multiple Episodes of Ischemic Preconditioning, 998

Coronary vasodilation
Inhibition of Nitric Oxide Production Aggravates Myocardial Hypoperfusion During Exercise in the Presence of a Coronary Artery Stenosis, 629
Coxsackievirus B
Viral Infection and the Pathogenesis of Dilated Cardiomyopathy, 182
CP-96,344
Blockade of Cardiac Inflammation in Mg^{2+} Deficiency by Substance P Receptor Inhibition, 1009
CP-96,345
Blockade of Cardiac Inflammation in Mg^{2+} Deficiency by Substance P Receptor Inhibition, 1009
Creatine kinase
Myocardial Ischemic Contracture: Metabolites Affect Rigor Tension Development and Stiffness, 920
Crista terminalis
Tissue-Specific Determinants of Anisotropic Conduction Velocity in Canine Atrial and Ventricular Myocardium, 1065
Cultured heart cells
Metabolic Coupling of Glutathione Between Mouse and Quail Cardiac Myocytes and Its Protective Role Against Oxidative Stress, 806
Cycle length
Subthreshold Stimulation of Purkinje Fibers Interrupts Ventricular Tachycardia in Intact Hearts: Experimental Study With Voltage-Sensitive Dyes and Imaging Techniques, 604
Cyclic flow variation
A Monoclonal Antibody Against Rabbit Tissue Factor Inhibits Thrombus Formation in Stenotic Injured Rabbit Carotid Arteries, 56
Cyclosporin toxicity
Mechanisms of the Endothelial Toxicity of Cyclosporin A: Role of Nitric Oxide, cGMP, and Ca^{2+}, 477
Cysteine
Nitrate Tolerance In Vivo Is Not Associated With Depletion of Arterial or Venous Thiol Levels, 115
Cytokines
Blockade of Cardiac Inflammation in Mg^{2+} Deficiency by Substance P Receptor Inhibition, 1009
Interleukin-2–Induced Lung Injury: The Role of Complement, 329
Cytoskeleton
Shear Stress–Induced Reorganization of the Surface Topography of Living Endothelial Cells Imaged by Atomic Force Microscopy, 163

D

Delayed rectifier K^+ current
Subcellular Mechanism for Ca^{2+}-Dependent Enhancement of Delayed Rectifier K^+ Current in Isolated Membrane Patches of Guinea Pig Ventricular Myocytes, 96
Triamterene Inhibits the Delayed Rectifier Potassium Current (I_K) in Guinea Pig Ventricular Myocytes, 1114
Development
Protein Kinase C Isoform Expression and Regulation in the Developing Rat Heart, 299
Developmental genetics
Cardiovascular Development: Prospects for a Genetic Approach, 757
Diabetes
Short-term Diabetes Alters K^+ Currents in Rat Ventricular Myocytes, 620
Diastolic tone
8-Bromo-cGMP Reduces the Myofilament Response to Ca^{2+} in Intact Cardiac Myocytes, 970
Dideoxynucleosides
Cardiac Mitochondrial DNA Polymerase-γ Is Inhibited Competitively and Noncompetitively by Phosphorylated Zidovudine, 344
Diffusion tensor
Anisotropy of Water Diffusion in the Myocardium of the Rat, 789
Digitalis
Immunologic Identification of Na^+,K^+-ATPase Isoforms in Myocardium: Isoform Change in Deoxycorticosterone Acetate–Salt Hypertension, 669
Digoxin-specific antibody Fab fragments
Brain "Ouabain" Mediates the Sympathoexcitatory and Hypertensive Effects of High Sodium Intake in Dahl Salt-Sensitive Rats, 586
4,4′-Diisothiocyanatostilbene-2,2′-disulfonic acid
Presence of Chloride-Formate Exchange in Vascular Smooth Muscle and Cardiac Cells, 48
Dimethylamiloride
Stunned Myocardium After Rapid Correction of Acidosis: Increased Oxygen Cost of Contractility and the Role of the Na^+-H^+ Exchange System, 794
Diuretics
Triamterene Inhibits the Delayed Rectifier Potassium Current (I_K) in Guinea Pig Ventricular Myocytes, 1114
DNA synthesis
Myocyte Cellular Hyperplasia and Myocyte Cellular Hypertrophy Contribute to Chronic Ventricular Remodeling in Coronary Artery Narrowing–Induced Cardiomyopathy in Rats, 383
Dobutamine
Myocardial Metabolism During Increased Work States in the Porcine Left Ventricle In Vivo, 64
Dogs
Potent Vasoconstriction Mediated by Endothelin ET_B Receptors in Canine Coronary Arteries, 105
Drosophila
Cardiovascular Development: Prospects for a Genetic Approach, 757

E

Electrical stimulation
Electrical Stimulation of Contractile Activity Accelerates Growth of Cultured Neonatal Cardiocytes, 448
Electron paramagnetic resonance
Ascorbyl Free Radical as a Real-time Marker of Free Radical Generation in Briefly Ischemic and Reperfused Hearts: An Electron Paramagnetic Resonance Study, 650
Electrophysiology
Significance of Inwardly Directed Transmembrane Current in Determination of Local Myocardial Electrical Activation During Ventricular Fibrillation, 507
Embryology
Cardiovascular Development: Prospects for a Genetic Approach, 757
Enalapril
Exaggerated Vascular Response Due to Endothelial Dysfunction and Role of the Renin-Angiotensin System at Early Stage of Renal Hypertension in Rats, 130
Endocardial cushions
Hyaluronate Degradation Affects Ventricular Function of the Early Postlooped Embryonic Rat Heart In Situ, 244
Endothelial cells
Effects of Temperature and Sodium on Myocardial and Hepatocellular Fatty Acid Uptake, 1
Expression and Subcellular Distribution of Basic Fibroblast Growth Factor Are Regulated During Migration of Endothelial Cells, 485
High-Density Lipoprotein Stimulates Endothelial Cell Movement by a Mechanism Distinct From Basic Fibroblast Growth Factor, 1149
Intracellular Alkalinization Induced by Bradykinin Sustains Activation of the Constitutive Nitric Oxide Synthase in Endothelial Cells, 1220
Shear Stress–Induced Reorganization of the Surface Topography of Living Endothelial Cells Imaged by Atomic Force Microscopy, 163
Endothelial factors
Endothelium-Mediated and Direct Actions of Acetylcholine on Rabbit Aortic Baroreceptors, 422

Purinergic Axis in Cardiac Blood Vessels: Agonist-Mediated Release of ATP From Cardiac Endothelial Cells, 401

Endothelial permeability
Relative Significance of Endothelium and Internal Elastic Lamina in Regulating the Entry of Macromolecules Into Arteries In Vivo, 74

Endothelin
Endothelin-Stimulated Secretion of Natriuretic Peptides by Rat Atrial Myocytes Is Mediated by Endothelin A Receptors, 460
Potent Vasoconstriction Mediated by Endothelin ET_B Receptors in Canine Coronary Arteries, 105

Endothelium
A Functional Ryanodine-Sensitive Intracellular Ca^{2+} Store Is Present in Vascular Endothelial Cells, 151
Chronic Exercise in Dogs Increases Coronary Vascular Nitric Oxide Production and Endothelial Cell Nitric Oxide Synthase Gene Expression, 349
Defective Endothelium-Dependent Relaxation in the JCR:LA-corpulent Rat, 1126
Exaggerated Vascular Response Due to Endothelial Dysfunction and Role of the Renin-Angiotensin System at Early Stage of Renal Hypertension in Rats, 130
Inhibition of Nitric Oxide Production Aggravates Myocardial Hypoperfusion During Exercise in the Presence of a Coronary Artery Stenosis, 629
Lysophosphatidylcholine in Oxidized Low-Density Lipoprotein Increases Endothelial Susceptibility to Polymorphonuclear Leukocyte–Induced Endothelial Dysfunction in Porcine Coronary Arteries: Role of Protein Kinase C, 565
Osteopontin Promotes Vascular Cell Adhesion and Spreading and Is Chemotactic for Smooth Muscle Cells In Vitro, 214
Reoxygenation-Induced Relaxation of Coronary Arteries: A Novel Endothelium-Dependent Mechanism, 870
Vascular Free Radical Release: Ex Vivo and In Vivo Evidence for a Flow-Dependent Endothelial Mechanism, 700

ets
cis-Regulatory Elements and *trans*-Acting Factors Directing Basal and cAMP-Stimulated Human Renin Gene Expression in Chorionic Cells, 764

Exchange-inhibitory peptide
Relation Between Reverse Sodium-Calcium Exchange and Sarcoplasmic Reticulum Calcium Release in Guinea Pig Ventricular Cells, 550

Excitable gap
The Mechanism of Termination of Reentrant Activity in Ventricular Fibrillation, 495

Excitation-contraction coupling
Myofilament Ca^{2+} Sensitivity in Intact Versus Skinned Rat Ventricular Muscle, 408
Taurine Depletion and Excitation-Contraction Coupling in Rat Myocardium, 1210

Exercise
Chronic Exercise in Dogs Increases Coronary Vascular Nitric Oxide Production and Endothelial Cell Nitric Oxide Synthase Gene Expression, 349

Extracellular matrix
Angiotensin II Induces Fibronectin Expression Associated With Cardiac Fibrosis in the Rat, 727

F

Fatty acid carrier
Effects of Temperature and Sodium on Myocardial and Hepatocellular Fatty Acid Uptake, 1

Fetus
Input Impedance of the Lower Abdominal Aorta in Chronically Instrumented Fetal Sheep, 641
Steady-State mRNA Levels of the Sarcolemmal Na^+-Ca^{2+} Exchanger Peak Near Birth in Developing Rabbit and Rat Hearts, 354

Fiber type
Peripheral Adaptations in Trained Aged Rats With Femoral Artery Stenosis, 235

Fibroblasts
Integrin-Mediated Collagen Gel Contraction by Cardiac Fibroblasts: Effects of Angiotensin II, 291

Fibrous intimal hyperplasia
Wall Shear Stress Temporal Gradient and Anastomotic Intimal Hyperplasia, 1227

Flow
Shear Stress–Induced Reorganization of the Surface Topography of Living Endothelial Cells Imaged by Atomic Force Microscopy, 163

Flow waveform
Input Impedance of the Lower Abdominal Aorta in Chronically Instrumented Fetal Sheep, 641

Fluorescent dyes
Significance of Inwardly Directed Transmembrane Current in Determination of Local Myocardial Electrical Activation During Ventricular Fibrillation, 507

Frank-Starling mechanism
The Failing Human Heart Is Unable to Use the Frank-Starling Mechanism, 959

Free radicals
Ascorbyl Free Radical as a Real-time Marker of Free Radical Generation in Briefly Ischemic and Reperfused Hearts: An Electron Paramagnetic Resonance Study, 650
Blockade of Cardiac Inflammation in Mg^{2+} Deficiency by Substance P Receptor Inhibition, 1009

Functional block
Mapping the Conversion of Atrial Flutter to Atrial Fibrillation and Atrial Fibrillation to Atrial Flutter: Insights Into Mechanisms, 882

Fura 2
Intracellular Calcium Transient of Working Human Myocardium of Seven Patients Transplanted for Congestive Heart Failure, 952

Furosemide
Presence of Chloride-Formate Exchange in Vascular Smooth Muscle and Cardiac Cells, 48

G

G proteins
Ca^{2+} Preconditioning Elicits a Unique Protection Against the Ca^{2+} Paradox Injury in Rat Heart: Role of Adenosine, 360
Changes in Type VI Adenylyl Cyclase Isoform Expression Correlate With a Decreased Capacity for cAMP Generation in the Aging Ventricle, 596
Characterization of Muscarinic Acetylcholine Receptors Expressed by an Atrial Cell Line Derived From a Transgenic Mouse Tumor, 752

Gap junctions
Metabolic Coupling of Glutathione Between Mouse and Quail Cardiac Myocytes and Its Protective Role Against Oxidative Stress, 806
Restricted Distribution of Connexin40, a Gap Junctional Protein, in Mammalian Heart, 839
Tissue-Specific Determinants of Anisotropic Conduction Velocity in Canine Atrial and Ventricular Myocardium, 1065

Gene expression
Chronic Exercise in Dogs Increases Coronary Vascular Nitric Oxide Production and Endothelial Cell Nitric Oxide Synthase Gene Expression, 349

Gene regulation
Endothelial Expression of Thrombomodulin Is Reversibly Regulated by Fluid Shear Stress, 852

Glibenclamide
ATP-Sensitive K^+ Channels Mediate Dilatation of Cerebral Arterioles During Hypoxia, 1005
Hypoxia Inhibits Myogenic Reactivity of Renal Afferent Arterioles by Activating ATP-Sensitive K^+ Channels, 861

γ-Glutamylcysteine synthetase
Metabolic Coupling of Glutathione Between Mouse and Quail Cardiac Myocytes and Its Protective Role Against Oxidative Stress, 806

Glutathione
Blockade of Cardiac Inflammation in Mg^{2+} Deficiency by Substance P Receptor Inhibition, 1009
Metabolic Coupling of Glutathione Between Mouse and Quail Cardiac Myocytes and Its Protective Role Against Oxidative Stress, 806
Nitrate Tolerance In Vivo Is Not Associated With Depletion of Arterial or Venous Thiol Levels, 115
Gracilis muscle
Impaired Nitric Oxide–Mediated Flow-Induced Dilation in Arterioles of Spontaneously Hypertensive Rats, 416
Growth factors
Hyperplastic Growth of Aortic Smooth Muscle Cells in Renovascular Hypertensive Rabbits Is Characterized by the Expansion of an Immature Cell Phenotype, 774
GTP regulatory proteins
Receptor-Effector Coupling Pathway for α_1-Adrenergic Modulation of Abnormal Automaticity in 'Ischemic' Canine Purkinje Fibers, 937

H

Heart
Downregulation of Myocardial β-Adrenergic Receptors: Receptor Subtype Selectivity, 369
Effects of Temperature and Sodium on Myocardial and Hepatocellular Fatty Acid Uptake, 1
Integrin-Mediated Collagen Gel Contraction by Cardiac Fibroblasts: Effects of Angiotensin II, 291
Molecular Basis of Cardiac Troponin T Isoform Heterogeneity in Rabbit Heart, 41
Restricted Distribution of Connexin40, a Gap Junctional Protein, in Mammalian Heart, 839
Three-Dimensional Transmural Mechanical Interaction Between the Coronary Vasculature and Passive Myocardium in the Dog, 1166
Heart connexin
Human Connexin43 Gap Junction Channels: Regulation of Unitary Conductances by Phosphorylation, 1050
Heart development
Hyaluronate Degradation Affects Ventricular Function of the Early Postlooped Embryonic Rat Heart In Situ, 244
Heart failure
Expression of β-Arrestins and β-Adrenergic Receptor Kinases in the Failing Human Heart, 206
Sarcoplasmic Reticulum Gene Expression in Cardiac Hypertrophy and Heart Failure, 555
The Failing Human Heart Is Unable to Use the Frank-Starling Mechanism, 959
Heart muscle
Modulation of Ca^{2+} Release in Cultured Neonatal Rat Cardiac Myocytes: Insight From Subcellular Release Patterns Revealed by Confocal Microscopy, 979
Heart rate
Relaxin Increases Heart Rate by Modulating Calcium Current in Cardiac Pacemaker Cells, 537
Ventricular Mechanoreflex and Chemoreflex Alterations in Chronic Heart Failure, 262
Heart size
Cardiovascular Development: Prospects for a Genetic Approach, 757
Hemodynamics
Potent Vasoconstriction Mediated by Endothelin ET_B Receptors in Canine Coronary Arteries, 105
Wall Shear Stress Temporal Gradient and Anastomotic Intimal Hyperplasia, 1227
Hexamethonium
Endothelium-Mediated and Direct Actions of Acetylcholine on Rabbit Aortic Baroreceptors, 422
High-density lipoprotein
High-Density Lipoprotein Stimulates Endothelial Cell Movement by a Mechanism Distinct From Basic Fibroblast Growth Factor, 1149
High-energy phosphates
Importance of Metabolic Inhibition and Cellular pH in Mediating Preconditioning Contractile and Metabolic Effects in Rat Hearts, 139
Hirudin
Distinct Receptors and Signaling Pathways in α-Thrombin– and Thrombin Receptor Peptide–Induced Vascular Contractions, 930
Histidine
Role of Histidine 95 on pH Gating of the Cardiac Gap Junction Protein Connexin43, 1058
H_2O_2 toxicity
Metabolic Coupling of Glutathione Between Mouse and Quail Cardiac Myocytes and Its Protective Role Against Oxidative Stress, 806
Human atria
β_2-Adrenergic Receptor and Angiotensin II Receptor Modulation of Sympathetic Neurotransmission in Human Atria, 434
Human forearm
In Vivo Characterization of Vasodilating Muscarinic-Receptor Subtypes in Humans, 912
Hyaluronate
Hyaluronate Degradation Affects Ventricular Function of the Early Postlooped Embryonic Rat Heart In Situ, 244
3-Hydroxy-3-methyl glutaryl coenzyme A reductase
3-Hydroxy-3-methyl Glutaryl Coenzyme A Reductase Inhibition Modulates Vasopressin-Stimulated Ca^{2+} Responses in Rat A10 Vascular Smooth Muscle Cells, 173
Hypernatremia
Acidemia and Hypernatremia Enhance Postischemic Recovery of Excitation-Contraction Coupling, 1197
Hypertension
Angiotensin II Induces Fibronectin Expression Associated With Cardiac Fibrosis in the Rat, 727
Expression of Prostaglandin H_2–Mediated Mechanism of Vascular Contraction in Hypertensive Rats: Relation to Lipoxygenase and Prostacyclin Synthase Activities, 197
Hyperplastic Growth of Aortic Smooth Muscle Cells in Renovascular Hypertensive Rabbits Is Characterized by the Expansion of an Immature Cell Phenotype, 774
Immunologic Identification of Na^+,K^+-ATPase Isoforms in Myocardium: Isoform Change in Deoxycorticosterone Acetate–Salt Hypertension, 669
Hypertrophy
Contractile Arrest Increases Sarcoplasmic Reticulum Calcium Uptake and SERCA2 Gene Expression in Cultured Neonatal Rat Heart Cells, 991
Electrical Stimulation of Contractile Activity Accelerates Growth of Cultured Neonatal Cardiocytes, 448
Hyperplastic Growth of Aortic Smooth Muscle Cells in Renovascular Hypertensive Rabbits Is Characterized by the Expansion of an Immature Cell Phenotype, 774
Hypoxia
Hypoxia Inhibits Myogenic Reactivity of Renal Afferent Arterioles by Activating ATP-Sensitive K^+ Channels, 861
Lactate Transport in Mammalian Ventricle: General Properties and Relation to K^+ Fluxes, 829
Regulation of *fos* and *jun* Immediate-Early Genes by Redox or Metabolic Stress in Cardiac Myocytes, 679

I

Ibuprofen
The Mechanism of Coronary Collateral Vasoconstriction in Response to Cyclooxygenase Blockade, 310
Imipramine
Imipramine Blocks Rapidly Activating and Delays Slowly Activating K^+ Current Activation in Guinea Pig Ventricular Myocytes, 687
Immunoblotting
Changes in Type VI Adenylyl Cyclase Isoform Expression Correlate With a Decreased Capacity for cAMP Generation in the Aging Ventricle, 596

Immunocytochemistry
Expression and Subcellular Distribution of Basic Fibroblast Growth Factor Are Regulated During Migration of Endothelial Cells, 485

Immunofluorescence
Tissue-Specific Determinants of Anisotropic Conduction Velocity in Canine Atrial and Ventricular Myocardium, 1065

Indo 1
A Functional Ryanodine-Sensitive Intracellular Ca^{2+} Store Is Present in Vascular Endothelial Cells, 151

Indomethacin
Impaired Nitric Oxide–Mediated Flow-Induced Dilation in Arterioles of Spontaneously Hypertensive Rats, 416

Input impedances
Input Impedance of the Lower Abdominal Aorta in Chronically Instrumented Fetal Sheep, 641

Insulin
Expression and Insulin-like Growth Factor–Dependent Proteolysis of Insulin-like Growth Factor–Binding Protein-4 Are Regulated by Cell Confluence in Vascular Smooth Muscle Cells, 576
Insulin-like Growth Factor I Inhibits Induction of Nitric Oxide Synthase in Vascular Smooth Muscle Cells, 24

Integrin
Intracellular Oxidative Stress Induced by Nitric Oxide Synthesis Inhibition Increases Endothelial Cell Adhesion to Neutrophils, 1133

Integrins
Integrin-Mediated Collagen Gel Contraction by Cardiac Fibroblasts: Effects of Angiotensin II, 291

Intercellular adhesion molecule-1
Lysophosphatidylcholine in Oxidized Low-Density Lipoprotein Increases Endothelial Susceptibility to Polymorphonuclear Leukocyte–Induced Endothelial Dysfunction in Porcine Coronary Arteries: Role of Protein Kinase C, 565
Regulation of Vascular Cell Adhesion Molecule-1 and Intercellular Adhesion Molecule-1 in Human Vascular Smooth Muscle Cells, 225

Interferon-γ
Regulation of Vascular Cell Adhesion Molecule-1 and Intercellular Adhesion Molecule-1 in Human Vascular Smooth Muscle Cells, 225

Interleukin-1β
Insulin-like Growth Factor I Inhibits Induction of Nitric Oxide Synthase in Vascular Smooth Muscle Cells, 24
Regulation of Vascular Cell Adhesion Molecule-1 and Intercellular Adhesion Molecule-1 in Human Vascular Smooth Muscle Cells, 225

Intermittent claudication
Peripheral Adaptations in Trained Aged Rats With Femoral Artery Stenosis, 235

Intima
Relative Significance of Endothelium and Internal Elastic Lamina in Regulating the Entry of Macromolecules Into Arteries In Vivo, 74
Time Course of Flow-Induced Smooth Muscle Cell Proliferation and Intimal Thickening in Endothelialized Baboon Vascular Grafts, 14

Intracellular calcium
3-Hydroxy-3-methyl Glutaryl Coenzyme A Reductase Inhibition Modulates Vasopressin-Stimulated Ca^{2+} Responses in Rat A10 Vascular Smooth Muscle Cells, 173
Myofilament Ca^{2+} Sensitivity in Intact Versus Skinned Rat Ventricular Muscle, 408

Intracellular magnesium
Myofilament Ca^{2+} Sensitivity in Intact Versus Skinned Rat Ventricular Muscle, 408

Intravascular thrombosis
A Monoclonal Antibody Against Rabbit Tissue Factor Inhibits Thrombus Formation in Stenotic Injured Rabbit Carotid Arteries, 56

Ischemia
Activation of Cardiac Vagal Afferents in Ischemia and Reperfusion: Prostaglandins Versus Oxygen-Derived Free Radicals, 904
ADP Inhibits the Sliding Velocity of Fluorescent Actin Filaments on Cardiac and Skeletal Myosins, 1027
Ascorbyl Free Radical as a Real-time Marker of Free Radical Generation in Briefly Ischemic and Reperfused Hearts: An Electron Paramagnetic Resonance Study, 650
Cellular Uncoupling Induced by Accumulation of Long-Chain Acylcarnitine During Ischemia, 83
Effect of Ischemia and Reperfusion on Cardiac Ryanodine Receptors–Sarcoplasmic Reticulum Ca^{2+} Channels, 271
Importance of Metabolic Inhibition and Cellular pH in Mediating Preconditioning Contractile and Metabolic Effects in Rat Hearts, 139
Inhibition of Nitric Oxide Production Aggravates Myocardial Hypoperfusion During Exercise in the Presence of a Coronary Artery Stenosis, 629
Lactate Transport in Mammalian Ventricle: General Properties and Relation to K^+ Fluxes, 829
Myocardial Metabolism During Increased Work States in the Porcine Left Ventricle In Vivo, 64
Potent Vasoconstriction Mediated by Endothelin ET_B Receptors in Canine Coronary Arteries, 105
Receptor-Effector Coupling Pathway for α_1-Adrenergic Modulation of Abnormal Automaticity in 'Ischemic' Canine Purkinje Fibers, 937
Regulation of *fos* and *jun* Immediate-Early Genes by Redox or Metabolic Stress in Cardiac Myocytes, 679

Isoforms
Hyperplastic Growth of Aortic Smooth Muscle Cells in Renovascular Hypertensive Rabbits Is Characterized by the Expansion of an Immature Cell Phenotype, 774
Molecular Basis of Cardiac Troponin T Isoform Heterogeneity in Rabbit Heart, 41

Isoproterenol
Downregulation of Myocardial β-Adrenergic Receptors: Receptor Subtype Selectivity, 369

Isosorbide dinitrate
Atrial Natriuretic Factor and Isosorbide Dinitrate Modulate the Gating of ATP-Sensitive K^+ Channels in Cultured Vascular Smooth Muscle Cells, 471

Isovolumic contraction
Dynamics of Normal and Ischemic Canine Papillary Muscles, 1179

Isovolumic relaxation
Dynamics of Normal and Ischemic Canine Papillary Muscles, 1179

J

jun-B
Extracellular ATP Induces Immediate-Early Gene Expression but Not Cellular Hypertrophy in Neonatal Cardiac Myocytes, 1034

K

K^+
Imipramine Blocks Rapidly Activating and Delays Slowly Activating K^+ Current Activation in Guinea Pig Ventricular Myocytes, 687
Lactate Transport in Mammalian Ventricle: General Properties and Relation to K^+ Fluxes, 829
Receptor-Effector Coupling Pathway for α_1-Adrenergic Modulation of Abnormal Automaticity in 'Ischemic' Canine Purkinje Fibers, 937
Short-term Diabetes Alters K^+ Currents in Rat Ventricular Myocytes, 620
Triamterene Inhibits the Delayed Rectifier Potassium Current (I_K) in Guinea Pig Ventricular Myocytes, 1114

Kidneys
Measurement of Renal Perfusion and Blood Flow With Fast Computed Tomography, 945

Kinin antagonist
Importance of Sympathetic Innervation in the Positive Inotropic Effects of Bradykinin and Ramiprilat, 441
Kininase II
Importance of Sympathetic Innervation in the Positive Inotropic Effects of Bradykinin and Ramiprilat, 441

L

Lactate
Lactate Transport in Mammalian Ventricle: General Properties and Relation to K^+ Fluxes, 829
Myocardial Metabolism During Increased Work States in the Porcine Left Ventricle In Vivo, 64
Lactic acid
Lactate Transport in Mammalian Ventricle: General Properties and Relation to K^+ Fluxes, 829
Left ventricular dynamics
Dynamics of Normal and Ischemic Canine Papillary Muscles, 1179
Leukocyte integrins
Molecular Determinants of Reperfusion-Induced Leukocyte Adhesion and Vascular Protein Leakage, 336
Leukocyte–endothelial cell adhesion
Modulation of Ischemia/Reperfusion-Induced Microvascular Dysfunction by Nitric Oxide, 376
Lineage
Cardiovascular Development: Prospects for a Genetic Approach, 757
Lipopolysaccharide
Methylene Blue Reverses Endotoxin-Induced Hypotension, 1121
Lipoxygenases
Expression of Prostaglandin H_2–Mediated Mechanism of Vascular Contraction in Hypertensive Rats: Relation to Lipoxygenase and Prostacyclin Synthase Activities, 197
The Mechanism of Coronary Collateral Vasoconstriction in Response to Cyclooxygenase Blockade, 310
Luciferase
cis-Regulatory Elements and *trans*-Acting Factors Directing Basal and cAMP-Stimulated Human Renin Gene Expression in Chorionic Cells, 764
Lysophosphatidylcholine
Lysophosphatidylcholine in Oxidized Low-Density Lipoprotein Increases Endothelial Susceptibility to Polymorphonuclear Leukocyte–Induced Endothelial Dysfunction in Porcine Coronary Arteries: Role of Protein Kinase C, 565

M

Macromolecular transport
Relative Significance of Endothelium and Internal Elastic Lamina in Regulating the Entry of Macromolecules Into Arteries In Vivo, 74
Macrophages
Inhibition of Inducible Nitric Oxide Synthase in Macrophages by Oxidized Low-Density Lipoproteins, 318
Magnetic resonance spectroscopy
Myocardial Metabolism During Increased Work States in the Porcine Left Ventricle In Vivo, 64
Mast cell degranulation
Modulation of Ischemia/Reperfusion-Induced Microvascular Dysfunction by Nitric Oxide, 376
Mechanical forces
Endothelial Expression of Thrombomodulin Is Reversibly Regulated by Fluid Shear Stress, 852
Mechanics
Three-Dimensional Transmural Mechanical Interaction Between the Coronary Vasculature and Passive Myocardium in the Dog, 1166
Mediated transfer of free fatty acid
The Capillary Transport System for Free Fatty Acids in the Heart, 1015
Membrane free fatty acid–binding protein
The Capillary Transport System for Free Fatty Acids in the Heart, 1015
Membrane transport mechanisms
Effects of Temperature and Sodium on Myocardial and Hepatocellular Fatty Acid Uptake, 1
Metabolic coupling
Metabolic Coupling of Glutathione Between Mouse and Quail Cardiac Myocytes and Its Protective Role Against Oxidative Stress, 806
Methylene blue
Methylene Blue Reverses Endotoxin-Induced Hypotension, 1121
Mg^{2+} deficiency
Blockade of Cardiac Inflammation in Mg^{2+} Deficiency by Substance P Receptor Inhibition, 1009
Microcirculation
Cocaine-Induced Microvascular Spasm in Yucatan Miniature Swine: In Vivo and In Vitro Evidence of Spasm, 281
Impaired Nitric Oxide–Mediated Flow-Induced Dilation in Arterioles of Spontaneously Hypertensive Rats, 416
Microspheres
Inhibition of Nitric Oxide Production Aggravates Myocardial Hypoperfusion During Exercise in the Presence of a Coronary Artery Stenosis, 629
Migration
Osteopontin Promotes Vascular Cell Adhesion and Spreading and Is Chemotactic for Smooth Muscle Cells In Vitro, 214
Mitochondrial
Cardiac Mitochondrial DNA Polymerase-γ Is Inhibited Competitively and Noncompetitively by Phosphorylated Zidovudine, 344
Monocarboxylate transport
Lactate Transport in Mammalian Ventricle: General Properties and Relation to K^+ Fluxes, 829
Monoclonal antibody
A Monoclonal Antibody Against Rabbit Tissue Factor Inhibits Thrombus Formation in Stenotic Injured Rabbit Carotid Arteries, 56
Morphology
Shear Stress–Induced Reorganization of the Surface Topography of Living Endothelial Cells Imaged by Atomic Force Microscopy, 163
Morphometry
Tissue-Specific Determinants of Anisotropic Conduction Velocity in Canine Atrial and Ventricular Myocardium, 1065
Motility
ADP Inhibits the Sliding Velocity of Fluorescent Actin Filaments on Cardiac and Skeletal Myosins, 1027
Mouse hearts
α-Skeletal Actin Is Associated With Increased Contractility in the Mouse Heart, 740
mRNA
Changes in Type VI Adenylyl Cyclase Isoform Expression Correlate With a Decreased Capacity for cAMP Generation in the Aging Ventricle, 596
Muscarinic receptors
In Vivo Characterization of Vasodilating Muscarinic-Receptor Subtypes in Humans, 912
Muscle, smooth
Hyperplastic Growth of Aortic Smooth Muscle Cells in Renovascular Hypertensive Rabbits Is Characterized by the Expansion of an Immature Cell Phenotype, 774
Mutation
Cardiovascular Development: Prospects for a Genetic Approach, 757
c-*myc*
Deregulated Expression of the c-*myc* Oncogene Abolishes Inhibition of Proliferation of Rat Vascular Smooth Muscle Cells by Serum Reduction, Interferon-γ, Heparin, and Cyclic Nucleotide Analogues and Induces Apoptosis, 525
Myocardial contrast echocardiography
In Vivo Myocardial Kinetics of Air-Filled Albumin Microbubbles During Myocardial Contrast Echocardiography: Comparison With Radiolabeled Red Blood Cells, 1157

Myocardial function
α-Skeletal Actin Is Associated With Increased Contractility in the Mouse Heart, 740
Myocardial infarction
Conscious Rabbits Become Tolerant to Multiple Episodes of Ischemic Preconditioning, 998
Myocardial metabolism
Myocardial Metabolism During Increased Work States in the Porcine Left Ventricle In Vivo, 64
Stunned Myocardium After Rapid Correction of Acidosis: Increased Oxygen Cost of Contractility and the Role of the Na^+-H^+ Exchange System, 794
Myocarditis
Viral Infection and the Pathogenesis of Dilated Cardiomyopathy, 182
Myocardium
Anisotropy of Water Diffusion in the Myocardium of the Rat, 789
Ascorbyl Free Radical as a Real-time Marker of Free Radical Generation in Briefly Ischemic and Reperfused Hearts: An Electron Paramagnetic Resonance Study, 650
Effects of Phosphorylation of Troponin I and C Protein on Isometric Tension and Velocity of Unloaded Shortening in Skinned Single Cardiac Myocytes From Rats, 718
Intracellular Calcium Transient of Working Human Myocardium of Seven Patients Transplanted for Congestive Heart Failure, 952
The Failing Human Heart Is Unable to Use the Frank-Starling Mechanism, 959
Myocytes
Downregulation of Myocardial β-Adrenergic Receptors: Receptor Subtype Selectivity, 369
Myocyte Cellular Hyperplasia and Myocyte Cellular Hypertrophy Contribute to Chronic Ventricular Remodeling in Coronary Artery Narrowing–Induced Cardiomyopathy in Rats, 383
Myofilaments
8-Bromo-cGMP Reduces the Myofilament Response to Ca^{2+} in Intact Cardiac Myocytes, 970
Myogenic vasoconstriction
Hypoxia Inhibits Myogenic Reactivity of Renal Afferent Arterioles by Activating ATP-Sensitive K^+ Channels, 861
Myosin
ADP Inhibits the Sliding Velocity of Fluorescent Actin Filaments on Cardiac and Skeletal Myosins, 1027
Hyperplastic Growth of Aortic Smooth Muscle Cells in Renovascular Hypertensive Rabbits Is Characterized by the Expansion of an Immature Cell Phenotype, 774

N

Na^+-Ca^{2+} exchange
Acidemia and Hypernatremia Enhance Postischemic Recovery of Excitation-Contraction Coupling, 1197
Contractile Arrest Increases Sarcoplasmic Reticulum Calcium Uptake and SERCA2 Gene Expression in Cultured Neonatal Rat Heart Cells, 991
Enhanced Na^+-Ca^{2+} Exchange Activity in Cardiomyopathic Syrian Hamster, 253
Steady-State mRNA Levels of the Sarcolemmal Na^+-Ca^{2+} Exchanger Peak Near Birth in Developing Rabbit and Rat Hearts, 354
Na^+
Effect of Extracellular ATP on the Na^+ Current in Rat Ventricular Myocytes, 710
Significance of Inwardly Directed Transmembrane Current in Determination of Local Myocardial Electrical Activation During Ventricular Fibrillation, 507
Na^+-H^+ exchange
Acidemia and Hypernatremia Enhance Postischemic Recovery of Excitation-Contraction Coupling, 1197
Na^+,K^+-ATPase
Immunologic Identification of Na^+,K^+-ATPase Isoforms in Myocardium: Isoform Change in Deoxycorticosterone Acetate–Salt Hypertension, 669
NADH oxidase
Angiotensin II Stimulates NADH and NADPH Oxidase Activity in Cultured Vascular Smooth Muscle Cells, 1141
NADPH oxidase
Angiotensin II Stimulates NADH and NADPH Oxidase Activity in Cultured Vascular Smooth Muscle Cells, 1141
Neurons
Responses of Neurons in the Nucleus Tractus Solitarius to Stimulation of Heart and Lung Receptors in the Rat, 1188
Neuropeptides
Actions of Vasoactive Intestinal Peptide and Neuropeptide Y on the Pacemaker Current in Canine Purkinje Fibers, 157
Blockade of Cardiac Inflammation in Mg^{2+} Deficiency by Substance P Receptor Inhibition, 1009
Neutrophil
Intracellular Oxidative Stress Induced by Nitric Oxide Synthesis Inhibition Increases Endothelial Cell Adhesion to Neutrophils, 1133
Newborn
Steady-State mRNA Levels of the Sarcolemmal Na^+-Ca^{2+} Exchanger Peak Near Birth in Developing Rabbit and Rat Hearts, 354
Nicardipine
Exaggerated Vascular Response Due to Endothelial Dysfunction and Role of the Renin-Angiotensin System at Early Stage of Renal Hypertension in Rats, 130
Nitrate tolerance
Nitrate Tolerance In Vivo Is Not Associated With Depletion of Arterial or Venous Thiol Levels, 115
Nitric oxide
Chronic Exercise in Dogs Increases Coronary Vascular Nitric Oxide Production and Endothelial Cell Nitric Oxide Synthase Gene Expression, 349
Exaggerated Vascular Response Due to Endothelial Dysfunction and Role of the Renin-Angiotensin System at Early Stage of Renal Hypertension in Rats, 130
Impaired Nitric Oxide–Mediated Flow-Induced Dilation in Arterioles of Spontaneously Hypertensive Rats, 416
Intracellular Alkalinization Induced by Bradykinin Sustains Activation of the Constitutive Nitric Oxide Synthase in Endothelial Cells, 1220
Mechanisms of the Endothelial Toxicity of Cyclosporin A: Role of Nitric Oxide, cGMP, and Ca^{2+}, 477
Methylene Blue Reverses Endotoxin-Induced Hypotension, 1121
Vascular Free Radical Release: Ex Vivo and In Vivo Evidence for a Flow-Dependent Endothelial Mechanism, 700
Nitric oxide synthase
Inhibition of Inducible Nitric Oxide Synthase in Macrophages by Oxidized Low-Density Lipoproteins, 318
Intracellular Alkalinization Induced by Bradykinin Sustains Activation of the Constitutive Nitric Oxide Synthase in Endothelial Cells, 1220
***N^G*-Nitro-L-arginine methyl ester**
Intracellular Oxidative Stress Induced by Nitric Oxide Synthesis Inhibition Increases Endothelial Cell Adhesion to Neutrophils, 1133
***N^ω*-Nitro-L-arginine**
Impaired Nitric Oxide–Mediated Flow-Induced Dilation in Arterioles of Spontaneously Hypertensive Rats, 416
***N^G*-Nitro-L-arginine**
Inhibition of Nitric Oxide Production Aggravates Myocardial Hypoperfusion During Exercise in the Presence of a Coronary Artery Stenosis, 629
Nitroglycerin
Nitrate Tolerance In Vivo Is Not Associated With Depletion of Arterial or Venous Thiol Levels, 115
***S*-Nitrosothiols**
Methylene Blue Reverses Endotoxin-Induced Hypotension, 1121
No-reflow phenomenon
The Relative Importance of Myocardial Energy Metabolism Compared With Ischemic Contracture in the Determination of Ischemic Injury in Isolated Perfused Rabbit Hearts, 817

Norepinephrine
β_2-Adrenergic Receptor and Angiotensin II Receptor Modulation of Sympathetic Neurotransmission in Human Atria, 434
Downregulation of Myocardial β-Adrenergic Receptors: Receptor Subtype Selectivity, 369
Endothelium-Mediated and Direct Actions of Acetylcholine on Rabbit Aortic Baroreceptors, 422
Nystatin-perforated patch clamp
Imipramine Blocks Rapidly Activating and Delays Slowly Activating K^+ Current Activation in Guinea Pig Ventricular Myocytes, 687

O

One-kidney, one-clip renal hypertension
Exaggerated Vascular Response Due to Endothelial Dysfunction and Role of the Renin-Angiotensin System at Early Stage of Renal Hypertension in Rats, 130
Osmotic minipump
Brain "Ouabain" Mediates the Sympathoexcitatory and Hypertensive Effects of High Sodium Intake in Dahl Salt-Sensitive Rats, 586
Osteopontin
Osteopontin Promotes Vascular Cell Adhesion and Spreading and Is Chemotactic for Smooth Muscle Cells In Vitro, 214
Ouabain
Immunologic Identification of Na^+,K^+-ATPase Isoforms in Myocardium: Isoform Change in Deoxycorticosterone Acetate–Salt Hypertension, 669
Oxidative stress
Metabolic Coupling of Glutathione Between Mouse and Quail Cardiac Myocytes and Its Protective Role Against Oxidative Stress, 806
Vascular Free Radical Release: Ex Vivo and In Vivo Evidence for a Flow-Dependent Endothelial Mechanism, 700
Oxidized low-density lipoproteins
Inhibition of Inducible Nitric Oxide Synthase in Macrophages by Oxidized Low-Density Lipoproteins, 318
Lysophosphatidylcholine in Oxidized Low-Density Lipoprotein Increases Endothelial Susceptibility to Polymorphonuclear Leukocyte–Induced Endothelial Dysfunction in Porcine Coronary Arteries: Role of Protein Kinase C, 565
Oxygen consumption
Peripheral Adaptations in Trained Aged Rats With Femoral Artery Stenosis, 235
Oxygen cost of contractility
Stunned Myocardium After Rapid Correction of Acidosis: Increased Oxygen Cost of Contractility and the Role of the Na^+-H^+ Exchange System, 794
Oxygen radicals
Activation of Cardiac Vagal Afferents by Oxygen-Derived Free Radicals in Rats, 895
Activation of Cardiac Vagal Afferents in Ischemia and Reperfusion: Prostaglandins Versus Oxygen-Derived Free Radicals, 904
Oxygen sensitivity
Reoxygenation-Induced Relaxation of Coronary Arteries: A Novel Endothelium-Dependent Mechanism, 870

P

P_2-purinergic receptors
Effect of Extracellular ATP on the Na^+ Current in Rat Ventricular Myocytes, 710
Pacemaker current
Actions of Vasoactive Intestinal Peptide and Neuropeptide Y on the Pacemaker Current in Canine Purkinje Fibers, 157
Papio cynocephalus
Time Course of Flow-Induced Smooth Muscle Cell Proliferation and Intimal Thickening in Endothelialized Baboon Vascular Grafts, 14
Paracrine communication
Relative Significance of Endothelium and Internal Elastic Lamina in Regulating the Entry of Macromolecules Into Arteries In Vivo, 74
Parasympathetic nervous system
In Vivo Characterization of Vasodilating Muscarinic-Receptor Subtypes in Humans, 912
Patch clamp
Properties of a Protein Kinase C–Activated Chloride Current in Guinea Pig Ventricular Myocytes, 121
Perfusion
Three-Dimensional Transmural Mechanical Interaction Between the Coronary Vasculature and Passive Myocardium in the Dog, 1166
pH_i
Importance of Metabolic Inhibition and Cellular pH in Mediating Preconditioning Contractile and Metabolic Effects in Rat Hearts, 139
Intracellular Alkalinization Induced by Bradykinin Sustains Activation of the Constitutive Nitric Oxide Synthase in Endothelial Cells, 1220
Role of Histidine 95 on pH Gating of the Cardiac Gap Junction Protein Connexin43, 1058
Phorbol esters
Protein Kinase C Isoform Expression and Regulation in the Developing Rat Heart, 299
Phosphocreatine
Myocardial Ischemic Contracture: Metabolites Affect Rigor Tension Development and Stiffness, 920
Myocardial Metabolism During Increased Work States in the Porcine Left Ventricle In Vivo, 64
Phospholipase C
Characterization of Muscarinic Acetylcholine Receptors Expressed by an Atrial Cell Line Derived From a Transgenic Mouse Tumor, 752
Phosphorylation
β-Adrenergic Receptor Stimulation Increases Unloaded Shortening Velocity of Skinned Single Ventricular Myocytes From Rats, 542
Effects of Phosphorylation of Troponin I and C Protein on Isometric Tension and Velocity of Unloaded Shortening in Skinned Single Cardiac Myocytes From Rats, 718
Pituitary-specific factor
cis-Regulatory Elements and *trans*-Acting Factors Directing Basal and cAMP-Stimulated Human Renin Gene Expression in Chorionic Cells, 764
Platelets
Insulin-like Growth Factor I Inhibits Induction of Nitric Oxide Synthase in Vascular Smooth Muscle Cells, 24
Modulation of Ischemia/Reperfusion-Induced Microvascular Dysfunction by Nitric Oxide, 376
Molecular Determinants of Reperfusion-Induced Leukocyte Adhesion and Vascular Protein Leakage, 336
Regulation of Vascular Cell Adhesion Molecule-1 and Intercellular Adhesion Molecule-1 in Human Vascular Smooth Muscle Cells, 225
Ploidy formation
Myocyte Cellular Hyperplasia and Myocyte Cellular Hypertrophy Contribute to Chronic Ventricular Remodeling in Coronary Artery Narrowing–Induced Cardiomyopathy in Rats, 383
POCA oxfenicine
Cellular Uncoupling Induced by Accumulation of Long-Chain Acylcarnitine During Ischemia, 83
Polarity
Cardiovascular Development: Prospects for a Genetic Approach, 757
The Mechanism of Termination of Reentrant Activity in Ventricular Fibrillation, 495
Polymerase chain reaction
Expression of β-Arrestins and β-Adrenergic Receptor Kinases in the Failing Human Heart, 206
Postacidosis stunned myocardium
Stunned Myocardium After Rapid Correction of Acidosis: Increased Oxygen Cost of Contractility and the Role of the Na^+-H^+ Exchange System, 794

Postextrasystolic potentiation
A Dynamic Model of the Cardiac Ventricular Action Potential: II. Afterdepolarizations, Triggered Activity, and Potentiation, 1097
Postischemic recovery
Acidemia and Hypernatremia Enhance Postischemic Recovery of Excitation-Contraction Coupling, 1197
Preconditioning
Ca^{2+} Preconditioning Elicits a Unique Protection Against the Ca^{2+} Paradox Injury in Rat Heart: Role of Adenosine, 360
Conscious Rabbits Become Tolerant to Multiple Episodes of Ischemic Preconditioning, 998
Importance of Metabolic Inhibition and Cellular pH in Mediating Preconditioning Contractile and Metabolic Effects in Rat Hearts, 139
Pressoreceptors
Endothelium-Mediated and Direct Actions of Acetylcholine on Rabbit Aortic Baroreceptors, 422
Pressure-volume area
Stunned Myocardium After Rapid Correction of Acidosis: Increased Oxygen Cost of Contractility and the Role of the Na^+-H^+ Exchange System, 794
Prostacyclin synthase
Expression of Prostaglandin H_2–Mediated Mechanism of Vascular Contraction in Hypertensive Rats: Relation to Lipoxygenase and Prostacyclin Synthase Activities, 197
Prostaglandins
Activation of Cardiac Vagal Afferents by Oxygen-Derived Free Radicals in Rats, 895
Activation of Cardiac Vagal Afferents in Ischemia and Reperfusion: Prostaglandins Versus Oxygen-Derived Free Radicals, 904
Expression of Prostaglandin H_2–Mediated Mechanism of Vascular Contraction in Hypertensive Rats: Relation to Lipoxygenase and Prostacyclin Synthase Activities, 197
Impaired Nitric Oxide–Mediated Flow-Induced Dilation in Arterioles of Spontaneously Hypertensive Rats, 416
The Mechanism of Coronary Collateral Vasoconstriction in Response to Cyclooxygenase Blockade, 310
Ventricular Mechanoreflex and Chemoreflex Alterations in Chronic Heart Failure, 262
Prosthetic vascular graft
Time Course of Flow-Induced Smooth Muscle Cell Proliferation and Intimal Thickening in Endothelialized Baboon Vascular Grafts, 14
Protease
Expression and Insulin-like Growth Factor–Dependent Proteolysis of Insulin-like Growth Factor–Binding Protein-4 Are Regulated by Cell Confluence in Vascular Smooth Muscle Cells, 576
Protein kinases
Effects of Phosphorylation of Troponin I and C Protein on Isometric Tension and Velocity of Unloaded Shortening in Skinned Single Cardiac Myocytes From Rats, 718
Lysophosphatidylcholine in Oxidized Low-Density Lipoprotein Increases Endothelial Susceptibility to Polymorphonuclear Leukocyte–Induced Endothelial Dysfunction in Porcine Coronary Arteries: Role of Protein Kinase C, 565
Properties of a Protein Kinase C–Activated Chloride Current in Guinea Pig Ventricular Myocytes, 121
Protein Kinase C Isoform Expression and Regulation in the Developing Rat Heart, 299
The cAMP Response Element Binding Protein Is Expressed and Phosphorylated in Cardiac Myocytes, 1042
Proto-oncogene
Regulation of *fos* and *jun* Immediate-Early Genes by Redox or Metabolic Stress in Cardiac Myocytes, 679
Pulmonary edema
Interleukin-2–Induced Lung Injury: The Role of Complement, 329
Pulsed field gradient nuclear magnetic resonance
Anisotropy of Water Diffusion in the Myocardium of the Rat, 789
Purinergic receptors
Extracellular ATP Induces Immediate-Early Gene Expression but Not Cellular Hypertrophy in Neonatal Cardiac Myocytes, 1034
Purinergic Axis in Cardiac Blood Vessels: Agonist-Mediated Release of ATP From Cardiac Endothelial Cells, 401
Purkinje fibers
Actions of Vasoactive Intestinal Peptide and Neuropeptide Y on the Pacemaker Current in Canine Purkinje Fibers, 157
The Mechanism of Termination of Reentrant Activity in Ventricular Fibrillation, 495

R

Rabbit
A Monoclonal Antibody Against Rabbit Tissue Factor Inhibits Thrombus Formation in Stenotic Injured Rabbit Carotid Arteries, 56
Cellular Uncoupling Induced by Accumulation of Long-Chain Acylcarnitine During Ischemia, 83
Molecular Basis of Cardiac Troponin T Isoform Heterogeneity in Rabbit Heart, 41
Radiopaque markers
Dynamics of Normal and Ischemic Canine Papillary Muscles, 1179
Rats
Contractile Arrest Increases Sarcoplasmic Reticulum Calcium Uptake and SERCA2 Gene Expression in Cultured Neonatal Rat Heart Cells, 991
Defective Endothelium-Dependent Relaxation in the JCR:LA-corpulent Rat, 1126
Hyaluronate Degradation Affects Ventricular Function of the Early Postlooped Embryonic Rat Heart In Situ, 244
Insulin-like Growth Factor I Inhibits Induction of Nitric Oxide Synthase in Vascular Smooth Muscle Cells, 24
Responses of Neurons in the Nucleus Tractus Solitarius to Stimulation of Heart and Lung Receptors in the Rat, 1188
Short-term Diabetes Alters K^+ Currents in Rat Ventricular Myocytes, 620
Taurine Depletion and Excitation-Contraction Coupling in Rat Myocardium, 1210
Red blood cells
In Vivo Myocardial Kinetics of Air-Filled Albumin Microbubbles During Myocardial Contrast Echocardiography: Comparison With Radiolabeled Red Blood Cells, 1157
Reendothelialization
Expression and Subcellular Distribution of Basic Fibroblast Growth Factor Are Regulated During Migration of Endothelial Cells, 485
Reentry
Mapping the Conversion of Atrial Flutter to Atrial Fibrillation and Atrial Fibrillation to Atrial Flutter: Insights Into Mechanisms, 882
Subthreshold Stimulation of Purkinje Fibers Interrupts Ventricular Tachycardia in Intact Hearts: Experimental Study With Voltage-Sensitive Dyes and Imaging Techniques, 604
Refractory period
The Mechanism of Termination of Reentrant Activity in Ventricular Fibrillation, 495
Regulated pathway
Brefeldin A Defines Distinct Pathways for Atrial Natriuretic Factor Secretion in Neonatal Rat Atrial and Ventricular Myocytes, 33
Phasic Secretion of Newly Synthesized Atrial Natriuretic Factor From Unstimulated Atrial Myocytes in Culture, 659
Relaxation
8-Bromo-cGMP Reduces the Myofilament Response to Ca^{2+} in Intact Cardiac Myocytes, 970
Relaxin
Relaxin Increases Heart Rate by Modulating Calcium Current in Cardiac Pacemaker Cells, 537
Renal microcirculation
Hypoxia Inhibits Myogenic Reactivity of Renal Afferent Arterioles by Activating ATP-Sensitive K^+ Channels, 861

Renal sympathetic nerve activity
Brain "Ouabain" Mediates the Sympathoexcitatory and Hypertensive Effects of High Sodium Intake in Dahl Salt-Sensitive Rats, 586
Renin gene
cis-Regulatory Elements and *trans*-Acting Factors Directing Basal and cAMP-Stimulated Human Renin Gene Expression in Chorionic Cells, 764
Reperfusion
Activation of Cardiac Vagal Afferents in Ischemia and Reperfusion: Prostaglandins Versus Oxygen-Derived Free Radicals, 904
Ascorbyl Free Radical as a Real-time Marker of Free Radical Generation in Briefly Ischemic and Reperfused Hearts: An Electron Paramagnetic Resonance Study, 650
Effect of Ischemia and Reperfusion on Cardiac Ryanodine Receptors–Sarcoplasmic Reticulum Ca^{2+} Channels, 271
Retrovirus
Deregulated Expression of the c-*myc* Oncogene Abolishes Inhibition of Proliferation of Rat Vascular Smooth Muscle Cells by Serum Reduction, Interferon-γ, Heparin, and Cyclic Nucleotide Analogues and Induces Apoptosis, 525
Reverse transcriptase
Cardiac Mitochondrial DNA Polymerase-γ Is Inhibited Competitively and Noncompetitively by Phosphorylated Zidovudine, 344
Ryanodine
A Functional Ryanodine-Sensitive Intracellular Ca^{2+} Store Is Present in Vascular Endothelial Cells, 151
Effect of Ischemia and Reperfusion on Cardiac Ryanodine Receptors–Sarcoplasmic Reticulum Ca^{2+} Channels, 271

S

Sarafotoxin S6c
Potent Vasoconstriction Mediated by Endothelin ET_B Receptors in Canine Coronary Arteries, 105
Sarcoplasmic reticulum
A Dynamic Model of the Cardiac Ventricular Action Potential: I. Simulations of Ionic Currents and Concentration Changes, 1071
Contractile Arrest Increases Sarcoplasmic Reticulum Calcium Uptake and SERCA2 Gene Expression in Cultured Neonatal Rat Heart Cells, 991
Effect of Ischemia and Reperfusion on Cardiac Ryanodine Receptors–Sarcoplasmic Reticulum Ca^{2+} Channels, 271
Relation Between Reverse Sodium-Calcium Exchange and Sarcoplasmic Reticulum Calcium Release in Guinea Pig Ventricular Cells, 550
Sarcoplasmic Reticulum Gene Expression in Cardiac Hypertrophy and Heart Failure, 555
Secretion
Brefeldin A Defines Distinct Pathways for Atrial Natriuretic Factor Secretion in Neonatal Rat Atrial and Ventricular Myocytes, 33
Phasic Secretion of Newly Synthesized Atrial Natriuretic Factor From Unstimulated Atrial Myocytes in Culture, 659
Selectins
Molecular Determinants of Reperfusion-Induced Leukocyte Adhesion and Vascular Protein Leakage, 336
Shear stress
Shear Stress–Induced Reorganization of the Surface Topography of Living Endothelial Cells Imaged by Atomic Force Microscopy, 163
Wall Shear Stress Temporal Gradient and Anastomotic Intimal Hyperplasia, 1227
Shortening velocity
β-Adrenergic Receptor Stimulation Increases Unloaded Shortening Velocity of Skinned Single Ventricular Myocytes From Rats, 542
Signal transduction
Distinct Receptors and Signaling Pathways in α-Thrombin– and Thrombin Receptor Peptide–Induced Vascular Contractions, 930
The cAMP Response Element Binding Protein Is Expressed and Phosphorylated in Cardiac Myocytes, 1042
Single channel conductance
Human Connexin43 Gap Junction Channels: Regulation of Unitary Conductances by Phosphorylation, 1050
Sinoatrial node cell
Relaxin Increases Heart Rate by Modulating Calcium Current in Cardiac Pacemaker Cells, 537
Site-directed mutagenesis
Role of Histidine 95 on pH Gating of the Cardiac Gap Junction Protein Connexin43, 1058
SKHep1 cells
Human Connexin43 Gap Junction Channels: Regulation of Unitary Conductances by Phosphorylation, 1050
Skinned fibers
Myocardial Ischemic Contracture: Metabolites Affect Rigor Tension Development and Stiffness, 920
Smooth muscle cells
3-Hydroxy-3-methyl Glutaryl Coenzyme A Reductase Inhibition Modulates Vasopressin-Stimulated Ca^{2+} Responses in Rat A10 Vascular Smooth Muscle Cells, 173
Developmentally Timed Expression of an Embryonic Growth Phenotype in Vascular Smooth Muscle Cells, 189
Expression and Insulin-like Growth Factor–Dependent Proteolysis of Insulin-like Growth Factor–Binding Protein-4 Are Regulated by Cell Confluence in Vascular Smooth Muscle Cells, 576
Osteopontin Promotes Vascular Cell Adhesion and Spreading and Is Chemotactic for Smooth Muscle Cells In Vitro, 214
Regulation of Vascular Cell Adhesion Molecule-1 and Intercellular Adhesion Molecule-1 in Human Vascular Smooth Muscle Cells, 225
Time Course of Flow-Induced Smooth Muscle Cell Proliferation and Intimal Thickening in Endothelialized Baboon Vascular Grafts, 14
Sodium 2-(5-(4-chlorophenyl)-pentyl)-oxirane-2-carboxylate
Cellular Uncoupling Induced by Accumulation of Long-Chain Acylcarnitine During Ischemia, 83
Sodium-calcium exchange
Relation Between Reverse Sodium-Calcium Exchange and Sarcoplasmic Reticulum Calcium Release in Guinea Pig Ventricular Cells, 550
Sodium cyanide
Importance of Metabolic Inhibition and Cellular pH in Mediating Preconditioning Contractile and Metabolic Effects in Rat Hearts, 139
Sodium nitroprusside
ATP-Sensitive K^+ Channels Mediate Dilatation of Cerebral Arterioles During Hypoxia, 1005
Endothelium-Mediated and Direct Actions of Acetylcholine on Rabbit Aortic Baroreceptors, 422
Impaired Nitric Oxide–Mediated Flow-Induced Dilation in Arterioles of Spontaneously Hypertensive Rats, 416
Stunning
Ascorbyl Free Radical as a Real-time Marker of Free Radical Generation in Briefly Ischemic and Reperfused Hearts: An Electron Paramagnetic Resonance Study, 650
Subcellular fractionation
Downregulation of Myocardial β-Adrenergic Receptors: Receptor Subtype Selectivity, 369
Subthreshold stimulation
Subthreshold Stimulation of Purkinje Fibers Interrupts Ventricular Tachycardia in Intact Hearts: Experimental Study With Voltage-Sensitive Dyes and Imaging Techniques, 604
Sudden cardiac death
Significance of Inwardly Directed Transmembrane Current in Determination of Local Myocardial Electrical Activation During Ventricular Fibrillation, 507
Superoxide anion
Angiotensin II Stimulates NADH and NADPH Oxidase Activity in Cultured Vascular Smooth Muscle Cells, 1141
Superoxide dismutase
Vascular Free Radical Release: Ex Vivo and In Vivo Evidence for a Flow-Dependent Endothelial Mechanism, 700

Supraventricular arrhythmias
Mapping the Conversion of Atrial Flutter to Atrial Fibrillation and Atrial Fibrillation to Atrial Flutter: Insights Into Mechanisms, 882

SV40 T antigen
Characterization of Muscarinic Acetylcholine Receptors Expressed by an Atrial Cell Line Derived From a Transgenic Mouse Tumor, 752

Sympathetic nerve endings
Importance of Sympathetic Innervation in the Positive Inotropic Effects of Bradykinin and Ramiprilat, 441

T

Taurine
Taurine Depletion and Excitation-Contraction Coupling in Rat Myocardium, 1210

Tethered-ligand receptor
Distinct Receptors and Signaling Pathways in α-Thrombin– and Thrombin Receptor Peptide–Induced Vascular Contractions, 930

Tetraethylammonium
Hypoxia Inhibits Myogenic Reactivity of Renal Afferent Arterioles by Activating ATP-Sensitive K^+ Channels, 861

α-Thrombin
Distinct Receptors and Signaling Pathways in α-Thrombin– and Thrombin Receptor Peptide–Induced Vascular Contractions, 930

Thrombosis
Endothelial Expression of Thrombomodulin Is Reversibly Regulated by Fluid Shear Stress, 852

Thromboxane A_2
The Mechanism of Coronary Collateral Vasoconstriction in Response to Cyclooxygenase Blockade, 310

Thromboxane–prostaglandin H_2 receptors
Expression of Prostaglandin H_2–Mediated Mechanism of Vascular Contraction in Hypertensive Rats: Relation to Lipoxygenase and Prostacyclin Synthase Activities, 197

Tissue factor
A Monoclonal Antibody Against Rabbit Tissue Factor Inhibits Thrombus Formation in Stenotic Injured Rabbit Carotid Arteries, 56

Tolerance
Conscious Rabbits Become Tolerant to Multiple Episodes of Ischemic Preconditioning, 998

Toxin labeling
Changes in Type VI Adenylyl Cyclase Isoform Expression Correlate With a Decreased Capacity for cAMP Generation in the Aging Ventricle, 596

Transforming growth factor-β
Regulation of Vascular Cell Adhesion Molecule-1 and Intercellular Adhesion Molecule-1 in Human Vascular Smooth Muscle Cells, 225

Trigger
Relation Between Reverse Sodium-Calcium Exchange and Sarcoplasmic Reticulum Calcium Release in Guinea Pig Ventricular Cells, 550

Triggered activity
A Dynamic Model of the Cardiac Ventricular Action Potential: II. Afterdepolarizations, Triggered Activity, and Potentiation, 1097

Troponins
Effects of Phosphorylation of Troponin I and C Protein on Isometric Tension and Velocity of Unloaded Shortening in Skinned Single Cardiac Myocytes From Rats, 718
Molecular Basis of Cardiac Troponin T Isoform Heterogeneity in Rabbit Heart, 41

Tumor necrosis factor-α
Insulin-like Growth Factor I Inhibits Induction of Nitric Oxide Synthase in Vascular Smooth Muscle Cells, 24
Regulation of Vascular Cell Adhesion Molecule-1 and Intercellular Adhesion Molecule-1 in Human Vascular Smooth Muscle Cells, 225

V

Vagus
Ventricular Mechanoreflex and Chemoreflex Alterations in Chronic Heart Failure, 262

Vascular cell adhesion molecule-1
Regulation of Vascular Cell Adhesion Molecule-1 and Intercellular Adhesion Molecule-1 in Human Vascular Smooth Muscle Cells, 225

Vascular permeability
Modulation of Ischemia/Reperfusion-Induced Microvascular Dysfunction by Nitric Oxide, 376
Molecular Determinants of Reperfusion-Induced Leukocyte Adhesion and Vascular Protein Leakage, 336

Vascular resistance
Hemodynamics in Transgenic Mice With Overexpression of Atrial Natriuretic Factor, 747

Vascular smooth muscle cells
Angiotensin II Stimulates NADH and NADPH Oxidase Activity in Cultured Vascular Smooth Muscle Cells, 1141
Atrial Natriuretic Factor and Isosorbide Dinitrate Modulate the Gating of ATP-Sensitive K^+ Channels in Cultured Vascular Smooth Muscle Cells, 471
Deregulated Expression of the c-*myc* Oncogene Abolishes Inhibition of Proliferation of Rat Vascular Smooth Muscle Cells by Serum Reduction, Interferon-γ, Heparin, and Cyclic Nucleotide Analogues and Induces Apoptosis, 525
Developmentally Timed Expression of an Embryonic Growth Phenotype in Vascular Smooth Muscle Cells, 189
Endothelium-Mediated and Direct Actions of Acetylcholine on Rabbit Aortic Baroreceptors, 422
Presence of Chloride-Formate Exchange in Vascular Smooth Muscle and Cardiac Cells, 48

Vasoactive intestinal peptide
Actions of Vasoactive Intestinal Peptide and Neuropeptide Y on the Pacemaker Current in Canine Purkinje Fibers, 157

Vasodilation
Mechanisms of the Endothelial Toxicity of Cyclosporin A: Role of Nitric Oxide, cGMP, and Ca^{2+}, 477

Vasopressin
3-Hydroxy-3-methyl Glutaryl Coenzyme A Reductase Inhibition Modulates Vasopressin-Stimulated Ca^{2+} Responses in Rat A10 Vascular Smooth Muscle Cells, 173

Venous occlusion plethysmography
In Vivo Characterization of Vasodilating Muscarinic-Receptor Subtypes in Humans, 912

Ventricular C fibers
Activation of Cardiac Vagal Afferents by Oxygen-Derived Free Radicals in Rats, 895
Activation of Cardiac Vagal Afferents in Ischemia and Reperfusion: Prostaglandins Versus Oxygen-Derived Free Radicals, 904

Ventricular fibrillation
Conscious Rabbits Become Tolerant to Multiple Episodes of Ischemic Preconditioning, 998

Ventricular myocytes
Imipramine Blocks Rapidly Activating and Delays Slowly Activating K^+ Current Activation in Guinea Pig Ventricular Myocytes, 687
Properties of a Protein Kinase C–Activated Chloride Current in Guinea Pig Ventricular Myocytes, 121

Ventricular receptors
Activation of Cardiac Vagal Afferents by Oxygen-Derived Free Radicals in Rats, 895

Ventricular tachycardia
Subthreshold Stimulation of Purkinje Fibers Interrupts Ventricular Tachycardia in Intact Hearts: Experimental Study With Voltage-Sensitive Dyes and Imaging Techniques, 604
Viral infection
Viral Infection and the Pathogenesis of Dilated Cardiomyopathy, 182
Voltage dependence
Imipramine Blocks Rapidly Activating and Delays Slowly Activating K^+ Current Activation in Guinea Pig Ventricular Myocytes, 687
Voltage-sensitive dyes
Subthreshold Stimulation of Purkinje Fibers Interrupts Ventricular Tachycardia in Intact Hearts: Experimental Study With Voltage-Sensitive Dyes and Imaging Techniques, 604

W

Wound healing
Angiotensin II Induces Fibronectin Expression Associated With Cardiac Fibrosis in the Rat, 727
Expression and Subcellular Distribution of Basic Fibroblast Growth Factor Are Regulated During Migration of Endothelial Cells, 485
High-Density Lipoprotein Stimulates Endothelial Cell Movement by a Mechanism Distinct From Basic Fibroblast Growth Factor, 1149

Z

Zebrafish
Cardiovascular Development: Prospects for a Genetic Approach, 757
